Siggraph Asia launches in Singapore (Variety)

First show will be held in Dec. 10-13

By PATRICK FRATER HONG KONG -- Asian animators and graphic artists will have a chance to put their tech suppliers through their paces next year with the launch of Siggraph Asia.
First show will be held in Singapore Dec. 10-13, 2008, with 2009 edition relocating to Yokohama, Japan.

A spin-off from ACM Siggraph event in the U.S., the show will feature "a wide spectrum of anchor programs designed to appeal to the event's target audience, such as academics, professionals, artists, animators and students," organizers Koelnmesse said in a statement. "The conference and exhibition will feature high-quality and original research papers, a computer animation festival, and hands-on courses and tutorials in the latest computer graphics and interactive techniques."
